CAL-FED- BAY DELTA PROGRAM

This letter is in regards to CAL-FED development of plans for managing the state of California's water supply in the new millennium.

If California is going to continue to have urban population swelling and further water needs for environmental uses, new water storage is needed, either surface or off stream. CAL-FED should not take any more water away from agriculture.

Our family operates a cattle ranch in the foothills of Tuolumne County. This ranch has been in our family for over 100 years. We have water right permits on this ranch for irrigating, livestock watering, wildlife enhancement, fire protection and recreational uses. We use all of the water allocated to us very diligently.

It is very important that any decision CAL-FED makes will not be a detriment to our water rights. Without our water, our land will not be as productive, as we have a hard time making a decent living now.

Our family is opposed to any decision that adversely affects our water rights.

Yours truly,

Mike Robison
Marianne Robison
